

Program Learning Outcomes

By the End of Five Year MBBS program, Graduate of UMDC should be able to;

1. **Clinical Competence**

Demonstrate the ability to integrate foundational medical knowledge with clinical skills in diagnosing, treating and managing patients effectively using evidence-based practices in line with advanced and modern healthcare systems.

2. **Patient-Centered Care**

Exhibit the capacity to provide holistic, patient-centered care, ensuring that all medical decisions reflect the unique needs, preferences, and values of patients from diverse backgrounds, while maintaining a high standard of empathy and communication.

3. **Ethical Practice and Professionalism**

Demonstrate ethical principles and professional standards, providing medical care without discrimination, and ensuring respect, integrity, and responsibility in all aspects of clinical practice.

4. **Commitment to Patient Safety**

Prioritize patient safety by following protocols, reducing risks, and engaging in practices that enhance the quality of care, ensuring a safe healthcare environment.

5. **Healthcare Accessibility and Affordability**

Identify the importance of providing accessible, affordable healthcare services to all sectors of society, with a focus on addressing healthcare disparities across different regions of Pakistan.

6. **Teamwork and Collaboration**

United Medical & Dental College

Policies, Procedures, & Guidelines

Demonstrate the ability to work collaboratively with interdisciplinary healthcare teams, effectively communicating and cooperating to provide comprehensive, high-quality patient care.

7. Clinical Proficiency in Essential Medical Procedures

Demonstrate competence in performing core medical procedures with precision, adhering to established protocols and safety guidelines.

8. Lifelong Learning and Continuous Improvement

Commit to lifelong learning, professional development, and continuous improvement in clinical practice, driven by a dedication to clinical excellence and ongoing education.
